INDEPENDENT AUDITORS' REVIEW REPORT

The Board of Directors and Shareholders
ASE Technology Holding Co., Ltd.

Introduction

We have reviewed the accompanying consolidated balance sheets of ASE Technology Holding Co., Ltd. (the "Company") and its subsidiaries (collectively, the "Group") as of June 30, 2026 and 2025, the related consolidated statements of comprehensive income for the three months ended June 30, 2026 and 2025 and for the six months ended June 30, 2026 and 2025, the consolidated statements of changes in equity and cash flows for the six months then ended, and the related notes to the consolidated financial statements, including material accounting policy information (collectively referred to as the "consolidated financial statements"). Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard No. 34 "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

Scope of Review

We conducted our reviews in accordance with the Standards on Review Engagements of the Republic of China 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that caused us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as of June 30, 2026 and 2025, its consolidated financial performance for the three months ended June 30, 2026 and 2025, and its consolidated financial performance and its consolidated cash flows for the six months ended June 30, 2026 and 2025 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard No. 34 "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

The engagement partners on the reviews resulting in this independent auditors' review report are Kai-Ning Hsu and Tzu-Yuan Chang.

Notice to Readers

The accompanying consolidated financial statements are intended only to present the consolidated financial position, financial performance and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to review such consolidated financial statements are those generally applied in the Republic of China.

For the convenience of readers, the independent auditors' review report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language independent auditors' review report and consolidated financial statements shall prevail.

1. GENERAL INFORMATION

ASE Technology Holding Co., Ltd. (the "Company") is a corporation incorporated in Nanzih Technology Industrial Park under the laws of Republic of China ("R.O.C.") starting from April 30, 2018 (date of incorporation). The Company and its subsidiaries (collectively referred to as the "Group") offer a comprehensive range of semiconductors packaging, testing, and electronic manufacturing services ("EMS").

The Company's subsidiaries, Advanced Semiconductor Engineering, Inc. (symbol "2311", "ASE") and Siliconware Precision Industries Co., Ltd. (symbol "2325", "SPIL"), entered into and executed a joint share exchange agreement to establish the Company, and the Company acquired all issued and outstanding ordinary shares of ASE and SPIL on April 30, 2018. Both of ASE's and SPIL's ordinary shares have been delisted while the ordinary shares of the Company were listed starting from the same date under the symbol "3711". In addition, ASE's ordinary shares that have been traded on the New York Stock Exchange (the "NYSE") under the symbol "ASX" in the form of American Depositary Shares ("ADS") since September 2000 were exchanged as the Company's ADSs under the same symbol "ASX" starting from April 30, 2018.

The Company's subsidiaries, ASE and SPIL, were approved by the competent authority to terminate their public offering in March 2024 and April 2024, respectively, and cease the status as a public company.

The ordinary shares of the Company's subsidiary, Universal Scientific Industrial (Shanghai) Co., Ltd. ("USISH"), have been listed on the Shanghai Stock Exchange under the symbol "601231" since February 2012.

The consolidated financial statements are presented in the Company's functional currency, New Taiwan dollar (NT$).

2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements were authorized by the board of directors on August 10, 2026.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

a. Initial application of the amendments to the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (collectively, the "IFRS Accounting Standards") endorsed and issued into effect by the Financial Supervisory Commission (the "FSC").

   The initial application of the IFRS Accounting Standards endorsed and issued into effect by the FSC did not have a material impact on the Group's accounting policies.

b. The IFRS Accounting Standards endorsed by the FSC for application starting from 2027

New, Revised or Amended Standards and Interpretations	Effective Date Announced by International Accounting Standards Board (IASB)
IFRS 18 "Presentation and Disclosure in Financial Statements"	January 1, 2027 (Note 1)

Note 1: IFRS 18 will take effect starting from January 1, 2028 for domestic entities. Earlier application is permitted.

IFRS 18 "Presentation and Disclosure in Financial Statements" and consequential amendments

IFRS 18 will supersede IAS 1 "Presentation of Financial Statements". The main changes comprise:

- To classify items of income and expenses presented in the statement of profit or loss into the operating, investing, financing, income taxes and discontinued operations categories, the Group shall assess whether it has specified main business activities of investing in particular types of assets and providing financing to customers.

- The statement of profit or loss shall present totals and subtotals for operating profit or loss, profit or loss before financing and income taxes and profit or loss.

- Provides guidance to enhance the requirements of aggregation and disaggregation: The Group shall identify the assets, liabilities, equity, income, expenses and cash flows that arise from individual transactions or other events and shall classify and aggregate them into groups based on shared characteristics, so as to result in the presentation in the primary financial statements of line items that have at least one similar characteristic. The Group shall disaggregate items with dissimilar characteristics in the primary financial statements and in the notes. The Group labels items as "other" only if it cannot find a more informative label.

- Disclosures on Management-defined Performance Measures (MPMs): When in public communications outside financial statements and communicating to users of financial statements management's view of an aspect of the financial performance of the Group as a whole, the Group shall disclose related information about its MPMs in a single note to the financial statements, including the description of such measures, calculations, reconciliations to the subtotal or total specified by IFRS Accounting Standards, and the income tax and non-controlling interests effects of related reconciliation items.

In addition, the following consequential amendments have been made to IAS 7 "Statement of Cash Flows":

- The Group shall use operating profit or loss as the starting point when presenting cash flows from operating activities under the indirect method.

- Interest and dividends received by the Group shall be classified as investing activities, while interest and dividends paid shall be classified as financing activities. However, if, after assessment, the Group has a specific main operating activity, it shall determine how to classify dividends received, interest received and interest paid in the statement of cash flows by referring to how it classifies dividend income, interest income and interest expense in the statement of profit or loss. The total of each of these cash flows shall be classified in a single category in the statement of cash flows.

Except for the above impact, as of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing other impacts of the above amended standards and interpretations on the Group's financial position and financial performance and will disclose the relevant impacts when the assessment is completed.

c. The IFRS Accounting Standards in issue but not yet endorsed and issued into effect by the FSC

New, Revised or Amended Standards and Interpretations	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between an Investor and its Associate or Joint Venture"	To be determined by IASB

Note 1: Unless stated otherwise, the above IFRS Accounting Standards are effective for annual reporting periods beginning on or after their respective effective dates.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Statement of compliance

These interim consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34 "Interim Financial Reporting" as endorsed and issued into effect by the FSC. Disclosure information included in these interim consolidated financial statements is less than the disclosure information required in a complete set of annual consolidated financial statements.

b. Basis of consolidation

1) Principles for preparing consolidated financial statements

The basis for the consolidated financial statements applied in these interim consolidated financial statements is consistent with those applied in the consolidated financial statements for the year ended December 31, 2025.

2) The detail information of the subsidiaries was as follows:

c. Other significant accounting policies

Except for the following, please refer to the consolidated financial statements for the year ended December 31, 2025.

1) Retirement benefits

Pension cost for an interim period is calculated on a year-to-date basis by using the actuarially determined pension cost rate at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant plan amendments, settlements, or other significant one-off events.

2) Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax. Interim period income taxes are assessed on an annual basis and calculated by applying to an interim period's pre-tax income the tax rate that would be applicable to expected total annual earnings.

5. MATERIAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, management is required to make judgments, estimates, and assumptions on the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and underlying assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised if the revisions affect only that year or in the year of the revisions and future years if the revisions affect both current and future years.

The material accounting judgments and key sources of estimation uncertainty adopted by these interim consolidated financial statements is disclosed in the consolidated financial statements for the year ended December 31, 2025.

6. CASH AND CASH EQUIVALENTS

The Group purchased 1,000 units of the abovementioned perpetual corporate bonds with par value of NT$1,000 thousand and the annual interest rate and effective interest rate were 3.5% and 3.2%, respectively. In June 2026, the Group disposed of the bonds following the issuer's redemption.

9. CREDIT RISK MANAGEMENT FOR INVESTMENTS IN DEBT INSTRUMENTS

The Group's investment in the abovementioned unsecured cumulative subordinate corporate bonds is rated the equivalent of investment grade or higher and has low credit risk for impairment assessment.

There was no significant increase in credit risk of such debt instrument since initial recognition leading to changes in interest rates and terms, and there was also no significant change in bond issuer's operation affecting the ability performing debt obligation. Therefore, no expected credit losses were recognized during the Group's holding period.

a. Trade receivables

1) At amortized cost

The Group's average credit terms granted to the customers were 30 to 90 days. The Group evaluates the risk and probability of credit loss of trade receivables by reference to the Group's past experiences, financial condition of each customer, as well as competitive advantage and future development of the industry in which the customer operates. The Group then reviews the recoverable amount of each individual trade receivable at each balance sheet date to ensure that adequate allowance is made for possible irrecoverable amounts. In this regard, management believes the Group's credit risk was significantly reduced.

The Group measures the loss allowance for trade receivables at an amount equal to lifetime ECLs. The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of economic conditions at each balance sheet date. As the Group's historical credit loss experience shows significantly different loss patterns for different customer groups, the provision matrix for expected credit loss allowance based on trade receivables due status is further distinguished according to the Group's different customer base.

The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery. For trade receivables that have been written off, the Group continues to engage in enforcement activity to attempt to recover the receivables due. Where recoveries are made, these are recognized in profit or loss.

The following table details the loss allowance of trade receivables based on the Group's provision matrix.

2) At FVTOCI

For the trade receivables due from certain customers, the Group decides whether or not to factor these trade receivables to banks without recourse based on the Group's demand of working capital. These trade receivables are classified as at FVTOCI because they are held within a business model whose objective is achieved by both the collection of contractual cash flows and the selling of financial assets.

The following table details the loss allowance of trade receivables at FVTOCI based on the Group's provision matrix.

b. Transfers of financial assets

1) Unqualified for derecognition of trade receivables

The Group's subsidiaries entered into accounts receivable factoring agreements with banks. Under the agreements, the banks have the right to request the Group's subsidiaries to settle the outstanding balance if the accounts receivable are not collected at maturity. As the Group's subsidiaries did not transfer substantially all risks and rewards relating to these trade receivables, they continued to recognize the full carrying amounts of these trade receivables and treated them as collateral for borrowings. Refer to Notes 35. However, after considering their working capital requirements, the Group's subsidiaries terminated the accounts receivable factoring agreements with the banks in August 2025.

For the six months ended June 30, 2025, the trade receivables accumulated factored and financed were NT$1,273,771 thousand and NT$781,630 thousand, respectively. As of June 30, 2025, the carrying amount of these trade receivables factored but not yet derecognized was NT$420,553 thousand, and the carrying amount of the related liabilities was NT$2,481 thousand.

2) Qualified for derecognition of bills receivable

The Group's subsidiary transferred a portion of its banker's acceptance bills in China to some of its suppliers or banks in order to settle trade payables or obtain financing through discounting arrangement. As the Group has transferred substantially all risks and rewards relating to these bills receivable, it derecognized the full carrying amount of these bills receivable and the corresponding trade payables to suppliers. However, if the derecognized bills receivable are not paid at maturity, the suppliers or banks have the right to request the Group to pay the unsettled balance; therefore, the Group still has continuing involvement in these bills receivable.

The maximum exposure to loss from the Group's continuing involvement in the derecognized bills receivable is equal to the carrying amount of the transferred but unsettled bills receivable. As of June 30, 2026, the carrying amount of these transferred but unsettled bills receivable was NT$158,951 thousand and will mature within 1-6 months subsequent to June 30, 2026.

Considering the credit risk of these derecognized bills receivable, the Group estimates that the fair values of its continuing involvement are not significant. The Group did not recognize any gains or

losses upon the transfer of these bills receivable. No gains or losses were recognized from the Group's continuing involvement during the current period or on a cumulative basis.

Based on the future operation plans and the capacity evaluation, the Group assessed that a portion of property, plant and equipment in the packaging segment, testing segment and other segment were not qualified for the production needs and, therefore, recognized an impairment loss of NT$32,345 thousand, NT$2,959 thousand, NT$34,403 thousand and NT$7,925 thousand, respectively, under the line item of other gains and losses for the three months and six months ended June 30, 2026 and 2025 (Note 25). The recoverable amount was determined using value in use and the Group expected to derive nearly no cash flows from these assets.

Each class of property, plant and equipment was depreciated on a straight-line basis over the following useful lives:

Land improvements	5-30 years
Buildings and improvements	
Main plant buildings	10-55 years
Cleanrooms	10-20 years
Others	3-24 years
Machinery and equipment	2-20 years
Other equipment	2-16 years

The capitalized borrowing costs for the three months and six months ended June 30, 2026 and 2025 are disclosed in Note 25.

	$ 541,814	$ 399,625	$ 968,182	$ 809,360

The amounts disclosed above with respect to the right-of-use assets did not include the right-of-use assets that meet the definition of investment properties.

b. Lease liabilities

	June 30, 2026	December 31, 2025	June 30, 2025
	NT$	NT$	NT$
Carrying amounts			
Current	$ 1,000,276	$ 969,441	$ 932,352
Non-current	$ 8,791,164	$ 7,878,666	$ 6,906,888

The Group's lease liabilities were mainly from land and buildings and improvements. The range of discount rates for lease liabilities was as follows:

	June 30, 2026	December 31, 2025	June 30, 2025
Land (%)	0.54-8.00	0.54-8.00	0.54-8.00
Buildings and improvements (%)	0.45-8.84	0.45-8.84	0.45-8.84

c. Material lease-in activities and terms

The Group leases land and buildings for the use of plants and offices with remaining lease terms of 1-58 years and 1-25 years, respectively. For the leasehold land located in the R.O.C., the Group has extension options at the expiry of the lease periods. However, the government has the right to adjust the lease payments on the basis of changes in announced land value prices and also has the right to terminate the lease contract under certain circumstances. The Group does not have bargain purchase options to acquire the leasehold land and buildings at the expiry of the lease periods. In addition, the Group is prohibited from subleasing or transferring all or any portion of the underlying assets without the lessor's consent.

d. Subleases

In addition to the sublease transactions described in Note 17, the Group did not have other sublease transactions.

e. Other lease information

	For the Three Months Ended June 30		For the Six Months Ended June 30	
	2026	2025	2026	2025
	NT$	NT$	NT$	NT$
Expenses relating to short-term leases	$ 399,930	$ 402,334	$ 851,090	$ 709,216

Right-of-use assets included in investment properties were leasehold land located in Shanghai and were subleased under operating leases.

The abovementioned investment properties were leased out for 1 to 20 years, with an option to extend for an additional lease term. The lease contracts contain market review clauses in the event that the lessees exercise their options to extend. The lessees do not have bargain purchase options to acquire the investment properties at the expiry of the lease term.

In addition to fixed lease payments, some of the lease contracts also indicated that the lessees should make variable payments determined at a specific percentage of the excess of respective lessee's monthly revenues over a specific amount.

The total lease payments to be received in the future under operating leases of investment properties were as follows:

	June 30, 2026	December 31, 2025	June 30, 2025
	NT$	NT$	NT$
Year 1	$ 1,242,969	$ 1,253,359	$ 1,116,649

	$ 3,903,909	$ 4,006,871	$ 3,821,181

The investment properties were depreciated on a straight-line basis over the following useful lives:

Main buildings	10-40 years
Right-of-use assets	10-50 years

The fair value of the investment properties was measured using the market approach and the income approach based on Level 3 inputs by independent professional appraisers. The significant unobservable inputs were discount rates. The fair value of the investment properties was as follows:

	June 30, 2026	December 31, 2025	June 30, 2025
	NT$	NT$	NT$
Fair value	$ 35,233,653	$ 33,806,692	$ 30,789,197

Refer to Note 35 for the carrying amount of the investment properties that had been pledged by the Group to secure borrowings.

In March 2021, the subsidiary, USISH, offered an unsecured overseas convertible bonds (the "USISH Bonds") in RMB3,450,000 thousand with a par value of RMB100. Within 5 trading days after maturity, USISH will redeem all the unconverted bonds at a price of 108% of the par value (including the interests of the last installment).

On January 7, 2026, the early redemption conditions were met as the closing price of the ordinary shares was at least 130% of the conversion price for at least 20 trading days out of 30 consecutive trading days. Accordingly, the board of directors of USISH resolved to process the early redemption in accordance with the bond issuance terms. As of January 31, 2026, bondholders had cumulatively converted USISH Bonds with an aggregate principal amount of RMB3,445,928 thousand into approximately 185,459 thousand ordinary shares of USISH. The remaining unconverted USISH Bonds, with a principal amount of RMB4,072 thousand, were fully redeemed early by USISH. The total redemption payment amounted to RMB4,138 thousand (including accrued interest).

	$ 165,900,080	$ 156,457,170	$ 150,554,089

1) Such capital surplus may be used to offset a deficit; in addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Company's capital surplus and once a year).

2) Such capital surplus arises from the effects of changes in ownership interests in subsidiaries resulting from equity transactions other than actual acquisitions or disposals, or from changes in capital surplus of subsidiaries accounted for using the equity method.

3) Such capital surplus represents the excess of the carrying amount of related accounts over the par value due to employee share options exercised and the Company has not completed registration formalities.

c. Retained earnings and dividend policy

The Articles of Incorporation of the Company (the "Articles") provides that annual net profit shall be distributed in the following order:

1) Replenishment of deficits;

2) 10.0% as legal reserve;

3) Special reserve appropriated or reversed in accordance with laws or regulations set forth by the authorities concerned;

4) If annual net profit remains, a proposal for the distribution of such amount together with a part or all of the accumulated undistributed profits from previous years shall be prepared by the board of directors and submitted to the shareholders' meeting for resolution. However, the distributable dividends may be paid in cash after a resolution has been adopted by a majority vote at a meeting of the board of directors attended by two-thirds of the total number of directors; and, in addition, a report of such distribution shall be submitted to the shareholders' meeting.

For the policies on the distribution of employees' compensation and remuneration of directors, refer to employees' compensation and remuneration of directors in Note 25(g).

The Company is currently in the mature growth stage. To meet the capital needs for business development now and in the future and satisfy the shareholders' demand for cash inflows, the Company shall use residual dividend policy to distribute dividends, of which the cash dividend is not lower than 30% of the total dividend distribution, with the remainder to be distributed in shares. A distribution plan is also to be made by the board of directors and submitted for resolution in the shareholders' meeting.

Appropriation of earnings to legal reserve shall be made until the legal reserve equals the Company's share capital. Legal reserve may be used to offset deficits. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's share capital, the excess may be transferred to capital or distributed in cash.

Items referred to under Rule No. 1090150022 issued by the FSC and in the directive titled "Questions and Answers for Special Reserves Appropriated Following Adoption of IFRS Accounting Standards" should be appropriated to or reversed from a special reserve by the Company.

The appropriation of earnings for 2025 and 2024 were as follows:

	Appropriation of Earnings		Dividends Per Share	
	For Year 2025	For Year 2024	For Year 2025	For Year 2024
	NT$	NT$	NT$ (in dollars)	NT$ (in dollars)

Cash dividends	$ 29,437,997	$ 23,420,372	$ 6.6	$ 5.3

The above 2025 and 2024 appropriations for cash dividends were resolved by the Company's board of directors in March 2026 and 2025, respectively; the other appropriations of earnings were resolved by the shareholders' meeting in June 2026 and 2025, respectively.

g. Employees' compensation and remuneration to directors

The Articles stipulates to distribute employees' compensation and remuneration to directors at the rates of 0.01%-1.00% and no higher than 0.75%, respectively, of net profit before income tax, employees' compensation and remuneration to directors. Pursuant to the amendment to the Securities and Exchange Act in August 2024, the Company's shareholders approved at the 2025 shareholders' meeting the amendment to the Articles to stipulate that, among the abovementioned employees' compensation, 0.01% to 0.05% shall be designated for grassroots employees.

If there is a change in the proposed amounts after the consolidated financial statement authorized for issue, the differences are recorded as a change in accounting estimate and will be adjusted in the following year.

In March 2026 and 2025, the board of directors resolved the appropriations of employees' compensation and remuneration to directors in cash for 2025 and 2024, respectively. The differences between the resolved amounts and the accrued amounts reflected in the annual consolidated financial statements for the years ended December 31, 2025 and 2024 were deemed changes in estimates. The differences were NT$1,286 thousand and NT$2,882 thousand, respectively, and were adjusted in net profit for 2026 and 2025, respectively.

b. Income tax assessments

The tax authorities have examined income tax returns of the Company and its R.O.C. subsidiaries through 2020 and 2024.

27. EARNINGS PER SHARE

The earnings and weighted average number of ordinary shares outstanding in the computation of earnings per share were as follows:

Net profit for the period

	For the Three Months Ended June 30		For the Six Months Ended June 30	
	2026	2025	2026	2025
	NT$	NT$	NT$	NT$
Profit for the period attributable to owners of the Company	$ 21,067,867	$ 7,521,085	$ 35,199,641	$ 15,074,918
Effect of potentially dilutive ordinary shares:

Earnings used in the computation of diluted earnings per share	$ 20,786,987	$ 7,476,465	$ 34,392,683	$ 14,708,809

Weighted average number of ordinary shares outstanding (in thousand shares):

	For the Three Months Ended June 30		For the Six Months Ended June 30	
	2026	2025	2026	2025
Weighted average number of ordinary shares in the computation of basic earnings per share	4,386,712	4,332,919	4,379,968	4,330,643
Effect of potentially dilutive ordinary shares:				
Employee share options	108,695	53,325	108,730	65,617
Employees' compensation	129	251	262	517
Employee restricted stock awards	10,167	8,692	10,011	9,330
Weighted average number of ordinary shares in the computation of diluted earnings per share	4,505,703	4,395,187	4,498,971	4,406,107

The Group is able to settle the employees' compensation by cash or shares. The Group assumed that the entire amount of the compensation would be settled in shares and the resulting potential shares were included in the weighted average number of ordinary shares outstanding used in the computation of diluted earnings per share if the effect is dilutive. Such dilutive effect of the potential shares was included in the computation of diluted earnings per share until the board of directors resolves the number of shares to be distributed to employees at their meeting in the following year.

28. SHARE-BASED PAYMENT ARRANGEMENTS

a. Employee share option plans of the Company

In order to attract, retain and reward employees, the Company and its subsidiary, ASE, have their employee share option plans for the Group's full-time employees. As disclosed in Note 1, the Company assumed ASE's obligations of outstanding employee share option plans starting from April 30, 2018, and each unexercised share option was converted at an exchange ratio of 1 for 0.5 share option of the Company. After conversion, each share option represents the right to purchase one ordinary share of the Company when exercised, and the exercise price is subject to adjustment according to the exchange ratio. The Company has the first and the second employee share option plans in November 2018 and August 2023 for full-time employees of the Group, with each unit representing the right to purchase one ordinary share issued by the Company. The right of those share options granted under the plans is valid for 10 years, non-transferable and exercisable at certain percentages subsequent to the second anniversary of the grant date. For the employee share option plans the Company assumed and issued, the exercise price is subject to adjustment according to the prescribed criteria stipulated in employee share option plans.

Information about the share option plans that the Company granted and assumed were as follows:

	For the Six Months Ended June 30			
	2026		2025	
	Number of Options (In Thousands)	Weighted Average Exercise Price Per Share (NT$)	Number of Options (In Thousands)	Weighted Average Exercise Price Per Share (NT$)

b. Employee restricted stock awards plans of the Company

To attract and retain talents as well as motivate and engage employees, the Company's annual shareholders' meetings resolved the second employee restricted stock awards plans in June 2024, and granted 16,500 thousand ordinary shares on the record date of September 6, 2024. The par value and the exercise price were NT$10 and NT$0 per share, respectively. The fair value at the grant day was NT$141.5 per share.

The vested shares are settled and released on an annual basis during a three-year period starting from the grant date. Up to one-third of the total shares granted will be vested only after the Company reaches specific performance targets before the end of each year-period. Except for inheritance, those shares shall not be sold, pledged, transferred, gifted, conditioned, or otherwise dispose of before vesting, while the rights of attending, proposing, speaking, voting and election at shareholders meeting and other rights, including but not limited to, stock dividend, cash dividend, distribution from legal reserve and capital surplus, share options at cash capital increase are identical with the Company's ordinary shares issued and outstanding. All the shares under this plan should be deposited in a trust account before vesting.

Upon granting, any unvested restricted stock awards are to be forfeited and canceled by the Company at no cost if the vesting conditions are not met. At the meantime, dividends (including cash dividends, stock dividends, and those distributed from legal reserves and capital surplus, as well as any derived income), distributed on those unvested restricted stock awards for the current unvested year, shall be fully returned to the Company by the custodian institution.

Information about employee restricted stock awards was as follows:

	For the Six Months Ended June 30	
	2026	2025
	(in thousand shares)	(in thousand shares)
Balance at January 1	10,870	16,500
Stocks unrestricted	(120)	-
Shares awaiting retired	-	(255)
Balance at June 30	10,750	16,245

During the second quarter of 2025, the Company reclaimed 255 thousand shares that were unvested and classified them under share capital awaiting retirement. The cancellation was resolved by the board of directors in July 2025, and the related deregistration procedures have been completed.

c. Employee share option plans of subsidiaries

USISH

Under the share option plan issued in 2015 ("2015 share options"), each unit represents the right to purchase one ordinary share of USISH when exercised. The options are valid for 10 years, non-transferable and exercisable at certain percentages subsequent to the second anniversary of the grant date incorporated with certain performance conditions. For any subsequent changes in USISH's capital structure, the exercise price is accordingly adjusted.

In September 2023, USISH's extraordinary general shareholders' meetings resolved to adopt the share option plan ("2023 share options"). In October 2023, the board of directors resolved to grant 14,506 thousand share options to its employees. Each unit represents the right to purchase one ordinary share of USISH when exercised. The options are valid for 2 years and 3 years, respectively, and are exercisable at certain percentages within 12 months subsequent to the first and the second anniversary of the grant date under the satisfaction of certain performance conditions within each respective vesting period. In the event that USISH increases share capital by capital surplus, conducts a rights issue, or distributes share dividends or cash dividends, the exercisable share option units and the exercise price are accordingly adjusted.

As of December 31, 2025, all of USISH's share options were exercised, forfeited or expired.

AMPI

In May 2021, the authority approved AMPI's employee share options plan with the issuance up to 10,000 thousand units. The options are valid for 10 years, non-transferable and exercisable at certain percentages subsequent to the second anniversary of the grant date. For any subsequent changes in AMPI's capital structure or distribution of cash dividends on ordinary shares, the exercise price will be adjusted accordingly.

Information about share options was as follows:

	For the Six Months Ended June 30			
	2026		2025	
	Number of Options (In Thousands)	Exercise Price Per Share (NT$)	Number of Options (In Thousands)	Exercise Price Per Share (NT$)

Options exercisable, end of period	3,100	29.7	2,325	29.7

Information about AMPI's outstanding share options at each balance sheet date was as follows:

	Range of Exercise Price Per Share (NT$)	Remaining Contractual Life (Years)
June 30, 2026		
2022 share options	$ 29.7	5.8

(Continued)

d. Employee restricted stock plans of subsidiaries

In September 2023, USISH's extraordinary general shareholders' meetings resolved to adopt restricted stock plan ("2023 restricted stocks") and granted 372 thousand shares and 5,722 thousand shares in November 2023 and January 2024, respectively, to its directors (excluding independent directors), supervisors and employees. The options are valid for 3 years. The valid period may be early terminated or extended prior to one month of the expiration date depending on the conditions of ordinary shares granted. Upon satisfaction of certain performance conditions in each phase, participants are entitled to subscribe USISH's ordinary shares issued under the plan at a certain percentage at the end of the lock-up period. The plan was of 2 phases with a lock-up period of 1 year and 2 years, respectively. As of December 31, 2025, all of USISH's 2023 restricted stocks were exercised or forfeited.

The Group's shareholdings in USISH decreased because the abovementioned share-based payment agreements were exercised during the six months ended June 30, 2025. The transaction was accounted for as an equity transaction since the Group did not cease to have control over USISH and, as a result, capital surplus increased by NT$135,686 thousand.

For the three months and six months ended June 30, 2026 and 2025, employee benefits expense recognized on the aforementioned share-based payment agreements were NT$288,965 thousand, NT$770,591 thousand, NT$627,559 thousand and NT$1,519,041 thousand, respectively.

29. BUSINESS COMBINATIONS

a. Subsidiaries acquired

Subsidiary	Principal Activity	Date of Acquisition	Proportion of Voting Equity Interests Acquired (%)	Consideration Transferred NT$
EugenLight	Engaged in the research, development, manufacturing and sales of high-speed optoelectronic integrated devices and optical engines.	January 15, 2026	65.47	$ 1,472,270

b. Consideration transferred

	EugenLight	ASEPG
	NT$	NT$
Cash	$ 1,472,270	$ 3,637,813

The consideration to acquire EugenLight paid by the subsidiary, Universal Optoelectronics, comprised the acquisition of EugenLight's shares and convertible bonds amounting to RMB326,692 thousand, and was fully paid in the first quarter of 2026.

In March 2026, the subsidiary, ASE Electronics (M) Sdn. Bhd., entered into a share purchase agreement with Linear Technology Pte Ltd. to acquire 100% shareholdings of ASEPG for a total consideration of US$115,854 thousand, which was fully paid as of June 30, 2026.

c. Assets acquired and liabilities assumed at the date of acquisition

	EugenLight	ASEPG

Others	(194,661)	(100,463)
Fair value of identifiable net assets acquired	$ 1,333,841	$ 1,776,320

The initial accounting for the acquisition of ASEPG was only provisionally determined as of June 30, 2026.

d. Goodwill recognized on acquisition

	EugenLight	ASEPG
	NT$	NT$
Consideration transferred	$ 1,472,270	$ 3,637,813

Less: Fair value of identifiable net assets acquired	(1,333,841)	(1,776,320)
Goodwill recognized on acquisition	$ 598,995	$ 1,861,493

The goodwill from acquisitions mainly represents the control premium. In addition, the consideration paid for acquisitions effectively included amounts attributed to the benefits of expected revenue growth and future market expansions. These benefits are not recognized separately from goodwill because they do not meet the recognition criteria for identifiable intangible assets.

The goodwill recognized on acquisitions is not expected to be deductible for income tax purposes.

As of June 30, 2026, the Group has completed the identification of the difference between the cost of the investment and the Group's share of the net fair value of EugenLight's identifiable assets and liabilities.

As of June 30, 2026, the Group has not completed the identification of the difference between the cost of the investment and the Group's share of the net fair value of ASEPG's identifiable assets and liabilities, the difference was provisionally recognized as goodwill as of June 30, 2026. The Group will continuously review the abovementioned items during the measuring period. If additional information, which relates to the facts or circumstances existed at the acquisition date and will lead to an adjustment to the provisional goodwill or the recognition of any liability provision, is obtained in the one year measurement period starting from the acquisition date, the accounting for the business combination will be retrospectively adjusted.

e. Net cash outflow on acquisition of subsidiaries

	EugenLight	ASEPG
	NT$	NT$
Consideration paid in cash	$ 1,472,270	$ 3,637,813
Less: Cash and cash equivalents acquired	(409,072)	(604,819)
Net cash outflow on acquisition of subsidiaries	$ 1,063,198	$ 3,032,994

f. Impact of acquisitions on the results of the Group's operations

The results of operations from the subsidiaries acquired since the acquisition dates included in the consolidated statements of comprehensive income were as follows:

	EugenLight (For the Period from January 15, 2026 through June 30, 2026)	ASEPG (For the Period from May 7, 2026 through June 30, 2026)
	NT$	NT$
Operating revenue	$ 442,990	$ 551,675
Net profit	$ 63,851	$ 44,647

Had the abovementioned business combinations been in effect at the beginning of 2026, the Group's pro-forma operating revenues and profit for the three months and six months ended June 30, 2026 would have been NT$191,523,058 thousand, NT$366,696,136 thousand, NT$21,480,437 thousand and NT$36,300,587 thousand, respectively. This pro-forma information is for illustrative purposes only and is not necessarily an indication of the operating revenue and results of operations of the Group that actually would have been achieved had the acquisition been completed at the beginning of the acquisition year, nor is it intended to be a projection of future results.

In determining the pro-forma operating revenue and profit for the period had the subsidiary been acquired at the beginning of the financial year, the Group has calculated the depreciation of property, plant and equipment and the amortization of intangible assets acquired on the basis of the fair values at the initial accounting for the business combination rather than the carrying amounts recognized in the respective pre-acquisition financial statements.

30. EQUITY TRANSACTIONS WITH NON-CONTROLLING INTERESTS

a. USISH

For the six months ended June 30, 2026 and 2025, USISH repurchased its own 758 thousand and 257 thousand outstanding ordinary shares, respectively, which made the Group's shareholdings of USISH increased. The transaction was accounted for as an equity transaction since the Group continued to have control over USISH and, as a result, the Group's capital surplus was decreased by NT$57,601 thousand and NT$3,984 thousand, respectively.

In the first quarter of 2026, the USISH Bonds were converted into 109,761 thousand ordinary shares of USISH which made the Group's shareholdings of USISH decreased. The transaction was accounted for as an equity transaction since the transaction did not change the Group's control over USISH and, as a result, the Group's capital surplus was then increased by NT$5,335,208 thousand (after retrospectively adjusted).

b. Universal Optoelectronics

In March 2026, the subsidiary, Universal Optoelectronics, acquired EugenLight's registered capital amounting to RMB472 thousand with a total consideration of RMB12,158 thousand, which made the Group's shareholdings of EugenLight increased. Since the transaction did not change the Group's control over EugenLight and, as a result, the Group's capital surplus was then decreased by NT$18,224 thousand (after retrospectively adjusted).

c. ASET

In June 2025, the subsidiary, ASET, conducted a public tender offer in cash for 6,386 thousand ordinary shares of another subsidiary, AMPI, at a total consideration of NT$57,475 thousand, which increased the Group's ownership in AMPI. This transaction did not alter the Group's control over AMPI and a reduction in capital surplus of NT$68,093 thousand was recognized.

31. CASH FLOW INFORMATION

a. Non-cash activities

In addition to other notes, the Group entered into the following investing activities which include both cash and non-cash items for the six months ended June 30, 2026 and 2025:

c. Supplier Financing Arrangements

The Group has entered into supplier financing arrangements with banks. Under these arrangements, the suppliers may elect to receive early payment from the banks by factoring their receivables due from the Group, and the Group then pays the banks at the original due dates set with suppliers. The above arrangements do not modify the terms of these payables because neither the Group's payment terms have been extended nor additional interest has been paid. Therefore, the Group still presents the payables as trade payables. As of June 30, 2026, December 31, 2025 and June 30, 2025, trade payables under supplier finance arrangements amounted to NT$220,499 thousand, NT$396,610 thousand and NT$623,363 thousand, respectively.

The carrying amount of the financial liabilities that are subject to supplier finance arrangements, of which suppliers have already received payment from the finance provider, are as follows:

	June 30, 2026	December 31, 2025	June 30, 2025
	NT$	NT$	NT$
Trade payables			
Of which suppliers have already received payment from the finance provider	$ 220,499	$ 396,607	$ 623,166

The range of payment due dates for the financial liabilities that are subject to supplier finance arrangements and comparable trade payables that are not part of a supplier finance arrangement are as follows:

	June 30, 2026	December 31, 2025	June 30, 2025
Trade payables			
Liabilities that are part of supplier finance arrangements	120~165 Days	120~165 Days	120~165 Days
Comparable trade payables that are not part of supplier finance arrangements	14~180 Days	30~180 Days	0~180 Days

The changes in liabilities that are subject to supplier finance arrangements are primarily attributable to additions resulting from purchases from suppliers and subsequent cash settlements. There were no material non-cash changes in these liabilities.

32. CAPITAL MANAGEMENT

The capital structure of the Group consists of debt and equity. The Group manages its capital to ensure that entities in the Group will be able to continue as going concerns while maximizing the return to shareholders through the optimization of the debt and equity balance. Key management personnel of the Group periodically reviews the cost of capital and the risks associated with each class of capital. In order to balance the overall capital structure, the Group may adjust the amount of dividends paid to shareholders, the number of new shares issued or repurchased, and the amount of new debt issued or existing debt redeemed.

The Group is not subject to any externally imposed capital requirements except those discussed in Note 20.

33. FINANCIAL INSTRUMENTS

a. Fair value of financial instruments that are not measured at fair value

1) Fair value of financial instruments not measured at fair value but for which fair value is disclosed

Except bonds payable measured at amortized cost, the management considered that the carrying amounts of financial assets and financial liabilities not measured at fair value approximate their fair values. The carrying amounts and fair value of bonds payable as of June 30, 2026, December 31, 2025 and June 30, 2025, respectively, were as follows:

	Carrying Amount	Fair Value
	NT$	NT$
June 30, 2026	$ 14,985,071	$ 14,969,952
December 31, 2025	14,967,630	15,583,145
June 30, 2025	25,167,162	26,032,395

2) Fair value hierarchy

The aforementioned fair value hierarchy of bonds payable was Level 3 which was determined based on discounted cash flow analysis with the applicable yield curve for the duration. The significant unobservable input was the discount rate that reflected the credit risk.

b. Fair value of financial instruments that are measured at fair value on a recurring basis

3) Valuation techniques and inputs applied for fair value measurement

a) Valuation techniques and inputs applied for Level 2 fair value measurement

Financial Instruments	Valuation Techniques and Inputs
Derivatives - swap contracts and forward exchange contracts	Discounted cash flows - Future cash flows are estimated based on observable forward exchange rates at balance sheet dates and contract forward exchange rates, discounted at rates that reflected the credit risk of various counterparties.
Derivatives - others	Future cash flows are estimated based on observable inputs derived directly or indirectly from active markets.

b) Valuation techniques and inputs applied for Level 3 fair value measurement

The fair value of accounts receivables measured at FVTOCI are determined based on the present value of future cash flows that reflect the credit risk of counterparties. Since the discount effect was not significant, the Group measured its fair value by using the nominal values.

The fair value of the contingent considerations is measured based on the fulfillment rate of the conditions stipulated in the agreement with discount rates reflecting the credit risks.

The fair value of equity-linked structured products and accumulator contracts are determined based on the correlation between the equity-linked underlyings and the quotes provided by the counterparties.

The Group determines the fair value of other Level 3 investments based on the nature of the underlying assets or instruments by using the market approach, asset-based approach and income approach. The market approach references valuation multiples of comparable companies, while the asset approach references net assets measured at fair value. The significant unobservable inputs used in the market approach and asset-based approach were the discount rates for lack of marketability of 15% to 30%. The income approach adopts a discounted cash flow methodology. The significant unobservable inputs were the discount rates of 14.3% to 17.8%. If the liquidity discount rates for lack of marketability to the valuation model increased by 1% and discount rates increased by 0.1% while all other variables held constant, the fair value of the abovementioned investments would have decreased approximately by NT$158,400 thousand, NT$26,700 thousand and NT$144,400 thousand as of June 30, 2026, December 31, 2025 and June 30, 2025, respectively.

d. Financial risk management objectives and policies

The derivative instruments used by the Group were to mitigate risks arising from ordinary business operations. All derivative transactions entered into by the Group were designated as either hedging or trading. Derivative transactions entered into for hedging purposes must hedge risk against fluctuations in foreign exchange rates and interest rates arising from operating activities. The currencies and the amounts of derivative instruments held by the Group must match its hedged assets and liabilities

denominated in foreign currencies.

The Group's risk management department monitored risks to mitigate risk exposures, reported unsettled position, transaction balances and related gains or losses to the Group's chief financial officer on a monthly basis.

1) Market risk

The Group's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates and interest rates. Gains or losses arising from fluctuations in foreign currency exchange rates of a variety of derivative financial instruments were approximately offset by those of hedged items. Interest rate risk was not significant because the expected funding cost had been fixed.

There had been no change to the Group's exposure to market risks or the manner in which these risks were managed and measured.

a) Foreign currency exchange rate risk

The Group had sales and purchases as well as investing and financing activities denominated in foreign currency which exposed the Group to foreign currency exchange rate risk. The Group entered into a variety of derivative financial instruments to hedge foreign currency exchange rate risk to minimize the fluctuations of assets and liabilities denominated in foreign currencies.

The carrying amounts of the Group's foreign currency denominated monetary assets and liabilities (including those eliminated upon consolidation) as well as derivative instruments which exposed the Group to foreign currency exchange rate risk at each balance sheet date are presented in Note 38.

The Group was mainly subject to the impact from the exchange rate fluctuation in US$ and JPY against NT$, RMB or EUR. 1% fluctuation is used when reporting foreign currency exchange rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign currency exchange rates. The sensitivity analysis included financial assets and liabilities and inter-company receivables and payables within the Group. The changes in profit before income tax due to a 1% change in US$ and JPY against NT$, RMB and EUR would be NT$69,000 thousand and NT$164,000 thousand for the six months ended June 30, 2026 and 2025, respectively. Hedging contracts and hedged items have been taken into account while measuring the changes in profit before income tax; however, the foreign currency risk exposure at the end of the reporting period did not reflect the exposure during the period.

Hedge accounting

The Group's hedging strategy was to lift borrowings denominated in foreign currencies to avoid exchange rate exposure from its investments in equity instruments denominated in foreign currencies (recognized under the line item of financial assets at FVTPL) and net investment in foreign subsidiary, Universal Scientific Industrial (France), which has EUR as its functional currency. Those transactions were designated as fair value hedges and a hedge of net investment in foreign operation, respectively. Hedge adjustments were made to totally offset the foreign exchange gains or losses from those equity instruments denominated in foreign currencies and foreign operations when they were evaluated based on the exchange rates on each balance sheet date.

The source of hedge ineffectiveness in these hedging relationships arose from the material difference between the notional amounts of borrowings denominated in foreign currencies and the fair value of investments in equity instruments denominated in foreign currencies and net

investment in foreign operations. No other sources of ineffectiveness are expected to emerge from these hedging relationships.

b) Interest rate risk

Except a portion of long-term borrowings and bonds payable at fixed interest rates, the Group was exposed to interest rate risk because group entities borrowed funds at floating interest rates. Changes in market interest rates led to variances in effective interest rates of borrowings from which the future cash flow fluctuations arise. The Group utilized financing instruments with low interest rates and favorable terms to maintain low financing cost, adequate banking facilities, as well as to hedge interest rate risk.

The carrying amounts of the Group's financial assets and financial liabilities with exposure to interest rates at each balance sheet date were as follows:

	June 30, 2026	December 31, 2025	June 30, 2025
	NT$	NT$	NT$
Fair value interest rate risk			
Financial assets	$ 49,467,989	$ 53,381,124	$ 41,036,702
Financial liabilities	127,842,566	84,870,569	61,434,284
Cash flow interest rate risk			
Financial assets	47,745,156	45,958,834	38,162,893
Financial liabilities	257,547,907	229,257,842	187,077,379

For assets and liabilities with floating interest rates, a 100 basis point increase or decrease was used when reporting interest rate risk internally to key management personnel. If interest rates had been 100 basis points (1%) higher or lower and all other variables held constant, the Group's profit before income tax for the six months ended June 30, 2026 and 2025 would have decreased or increased approximately by NT$1,049,000 thousand and NT$745,000 thousand, respectively.

c) Other price risk

The Group was exposed to equity price risk through its investments in financial assets at FVTPL and financial assets at FVTOCI. If equity price was 1% higher or lower, profit before income tax for the six months ended June 30, 2026 and 2025 would have increased or decreased approximately by NT$104,300 thousand and NT$37,100 thousand, respectively, and other comprehensive income before income tax for the six months ended June 30, 2026 and 2025 would have increased or decreased approximately by NT$131,000 thousand and NT$118,000 thousand, respectively.

2) Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group's credit risk arises from cash and cash equivalents, contract assets, trade and other receivables and other financial assets. The Group's maximum exposure to credit risk was the carrying amounts of financial assets in the consolidated balance sheets.

As of June 30, 2026, December 31, 2025 and June 30, 2025, the Group's ten largest customers accounted for 48%, 50% and 47% of trade receivables, respectively. The Group transacts with a large number of unrelated customers and, thus, no concentration of credit risk was observed.

3) Liquidity risk

The Group manages liquidity risk by maintaining adequate working capital and banking facilities to fulfill the demand for cash flow used in the Group's operation and capital expenditure. The Group also monitors its compliance with all the loan covenants. Liquidity risk is not considered to be significant.

In the table below, financial liabilities with a repayment on demand clause were included in the earliest time band regardless of the probability of counter-parties choosing to exercise their rights. The maturity dates for other non-derivative financial liabilities were based on the agreed repayment dates.

The interest cash flows paid at a floating interest rate, along with the undiscounted interest amounts, were based on the interest rates as of each balance sheet date to estimate future interest cash flows.

The amounts of the floating interest rate instruments of the aforementioned non-derivative financial liabilities were subject to change if floating interest rates differ from those estimates of interest rates determined at each balance sheet date.

The following table detailed the Group's liquidity analysis for its derivative financial instruments. The table was based on the undiscounted contractual net cash inflows and outflows on derivative instruments settled on a net basis, and the undiscounted gross cash inflows and outflows on those derivatives that require gross settlement. When the amounts payable or receivable are not fixed, the amounts disclosed have been determined by reference to the projected interest rates as illustrated by the yield curves at each balance sheet date.

40. OPERATING SEGMENTS INFORMATION

The Group has the following reportable segments: Packaging, Testing and EMS. The Group packages bare semiconductors into finished semiconductors with enhanced electrical and thermal characteristics; provides testing services, including front-end engineering testing, wafer probing and final testing services; engages in the designing, assembling, manufacturing and sale of electronic components and telecommunications equipment motherboards. Information about other business activities and operating segments that are not reportable are combined and disclosed in "Others." The Group engages in other activities such as substrate production as well as sale and leasing of real estate properties.

The accounting policies for segments are the same as those described in Note 4. The measurement basis for resources allocation and performance evaluation is based on profit before income tax.
